

CDSSG meets 2015/16 targets

CDSSG has undertaken a significant work programme in 2015/16

The tasks were:

Task 1

Mapping of seamless supply chain – powerpoint overview of current status of the supply chain and key issues to be addressed

Task 2

Systems design to support operational climate data production at JASMIN/CEMS, plus report on data licensing issues

Task 3

Near-real time ozone and methane data production at JASMIN/CEMS (Powerpoint with notes)

Task 4

Climate data exploration application – lessons learned report, including links to code and demonstration videos

Task 5

Costing report for operational support system at JASMIN/CEMS
(described in task 2)
